

API Reference

Base URL: `http://localhost:4000/api/v1` (dev) | `https://api.yourdomain.com/api/v1` (prod)

Auth: All protected routes require `Authorization: Bearer <accessToken>` header.

Swagger UI: Available at `/api/docs` on the backend server.

Authentication

Method	Path	Auth	Description
POST	<code>/auth/register</code>	—	Register org + first user
POST	<code>/auth/login</code>	—	Login, returns tokens
POST	<code>/auth/refresh</code>	—	Refresh access token
POST	<code>/auth/logout</code>	JWT	Logout
POST	<code>/auth/me</code>	JWT	Current user profile
POST	<code>/auth/change-password</code>	JWT	Change own password
POST	<code>/auth/check-email</code>	—	Check email availability

Portal Auth

Method	Path	Description
POST	<code>/portal/auth/login</code>	Portal user login
POST	<code>/portal/auth/activate</code>	Activate portal account

Method	Path	Description
POST	<code>/portal/auth/refresh</code>	Refresh portal token
POST	<code>/portal/auth/forgot-password</code>	Password reset request
POST	<code>/portal/auth/reset-password</code>	Reset with token
GET	<code>/portal/auth/password-policy</code>	Org password requirements

Users

Method	Path	Description
GET	<code>/users</code>	List org users
POST	<code>/users</code>	Create user
GET	<code>/users/me/permissions</code>	My resolved permissions
GET	<code>/users/me/profile</code>	My profile
PATCH	<code>/users/me</code>	Update my profile
GET	<code>/users/:id</code>	Get user
PATCH	<code>/users/:id</code>	Update user
DELETE	<code>/users/:id</code>	Soft delete
DELETE	<code>/users/:id/permanent</code>	Hard delete (ADMIN+)
PATCH	<code>/users/:id/suspend</code>	Suspend (SUPER_ADMIN)
PATCH	<code>/users/:id/unsuspend</code>	Unsuspend
PATCH	<code>/users/:id/lock</code>	Lock account
PATCH	<code>/users/:id/unlock</code>	Unlock account
POST	<code>/users/:id/reset-password</code>	Force password reset

Method	Path	Description
GET	<code>/users/:id/permissions</code>	Get permission summary
POST	<code>/users/:id/permission-overrides</code>	Set override (SUPER_ADMIN)
DELETE	<code>/users/permission-overrides/:id</code>	Remove override

Organizations & Departments

Method	Path	Description
GET	<code>/organizations/me</code>	Current org
PATCH	<code>/organizations/me</code>	Update org (ADMIN+)
GET	<code>/organizations/me/stats</code>	Org statistics
GET	<code>/departments</code>	List departments
POST	<code>/departments</code>	Create department
PATCH	<code>/departments/:id</code>	Update department
DELETE	<code>/departments/:id</code>	Delete department
GET	<code>/departments/:id/members</code>	List members
POST	<code>/departments/:id/members/:userId</code>	Add member
DELETE	<code>/departments/:id/members/:userId</code>	Remove member
PATCH	<code>/departments/:id/permissions</code>	Set permissions
PATCH	<code>/departments/:id/head</code>	Set head

Modules (Dynamic Tables)

Method	Path	Description
GET	/modules	List modules
POST	/modules	Create module
GET	/modules/:id	Get module
GET	/modules/by-slug/:slug	Get by slug
PATCH	/modules/:id	Update module
DELETE	/modules/:id	Delete module

Fields

Method	Path	Description
GET	/modules/:moduleId/fields	List fields
POST	/modules/:moduleId/fields	Create field
PATCH	/modules/:moduleId/fields/:id	Update field
POST	/modules/:moduleId/fields/reorder	Reorder fields
DELETE	/modules/:moduleId/fields/:id	Delete field

Field Rules

Method	Path	Description
GET	/modules/:moduleId/field-rules	List rules
POST	/modules/:moduleId/field-rules	Create rule
PATCH	/modules/:moduleId/field-rules/:id	Update rule
DELETE	/modules/:moduleId/field-rules/:id	Delete rule

Records

Method	Path	Description
GET	/modules/:moduleId/records	List records (paginated, filterable)
POST	/modules/:moduleId/records	Create record
GET	/modules/:moduleId/records/:id	Get record
PATCH	/modules/:moduleId/records/:id	Update record
DELETE	/modules/:moduleId/records/:id	Soft delete
POST	/modules/:moduleId/records/bulk-delete	Bulk delete
POST	/modules/:moduleId/records/bulk-update	Bulk field update
GET	/modules/:moduleId/records/export/csv	Export CSV
GET	/modules/:moduleId/records/import/template	Download import template
POST	/modules/:moduleId/records/import/preview	Preview CSV import
POST	/modules/:moduleId/records/import/run	Execute import
POST	/modules/:moduleId/records/:id/comments	Add comment
GET	/modules/:moduleId/records/:id/activity	Activity log
POST	/modules/:moduleId/records/:id/duplicate	Duplicate record
PATCH	/modules/:moduleId/records/:id/archive	Toggle archive
PATCH	/modules/:moduleId/records/:id/lock	Toggle lock
GET	/records/lookup	Search for lookup field values

Views

Method	Path	Description
GET	/modules/:moduleId/views	List views
POST	/modules/:moduleId/views	Create view
GET	/modules/:moduleId/views/:id	Get view
PATCH	/modules/:moduleId/views/:id	Update view
DELETE	/modules/:moduleId/views/:id	Delete view
PATCH	/modules/:moduleId/views/:id/toggle-pin	Toggle pin

Analytics & Dashboards

Method	Path	Description
POST	/analytics/data/:moduleId	Get aggregated data
POST	/analytics/kanban/:moduleId	Kanban board data
GET	/analytics/views/list	Saved analytics views
POST	/analytics/views	Create saved view
PATCH	/analytics/views/:id	Update saved view
DELETE	/analytics/views/:id	Delete saved view
GET	/analytics/saved-filters	Saved filters
POST	/analytics/saved-filters	Create filter
GET	/analytics/targets/list	Analytics targets
POST	/analytics/targets	Create target
POST	/analytics/targets/:id/compute	Compute target
GET	/pivot/:moduleId/data	Pivot table data

Method	Path	Description
GET	<code>/dashboards</code>	List dashboards
POST	<code>/dashboards</code>	Create dashboard
PATCH	<code>/dashboards/:id</code>	Update dashboard
DELETE	<code>/dashboards/:id</code>	Delete dashboard
GET	<code>/reports</code>	Saved reports
POST	<code>/reports</code>	Create report
PATCH	<code>/reports/:id</code>	Update report

Forms

Method	Path	Auth	Description
GET	<code>/forms</code>	JWT	List forms
POST	<code>/forms</code>	JWT	Create form
GET	<code>/forms/:id</code>	JWT	Get form
PATCH	<code>/forms/:id</code>	JWT	Update form
DELETE	<code>/forms/:id</code>	JWT	Delete form
POST	<code>/forms/:id/sections</code>	JWT	Add section
POST	<code>/forms/:id/fields</code>	JWT	Add field
POST	<code>/forms/:id/fields/reorder</code>	JWT	Reorder fields
POST	<code>/forms/:id/generate-token</code>	JWT	Generate public link token
GET	<code>/forms/:id/submissions</code>	JWT	List submissions
GET	<code>/public/forms/:token</code>	—	Get public form

Method	Path	Auth	Description
POST	/public/forms/:token/submit	—	Submit form
POST	/public/forms/:token/extract-document	—	OCR document extraction

Workflows

Method	Path	Description
GET	/workflows	List workflows
POST	/workflows	Create workflow
PATCH	/workflows/:id	Update workflow
PATCH	/workflows/:id/toggle	Enable/disable
GET	/workflows/:id/executions	Execution history
POST	/workflows/:id/execute-on-record	Test on record

Blueprints (Stage Workflows)

Method	Path	Description
GET	/blueprints	List blueprints
POST	/blueprints	Create blueprint
GET	/blueprints/for-record/:recordId	Available transitions
POST	/blueprints/execute-transition	Execute transition
GET	/blueprints/my-pending-tasks	My pending tasks
POST	/blueprints/pending-tasks/:id/action	Approve/reject

Notifications & Messaging

Method	Path	Description
GET	<code>/notifications</code>	List notifications
GET	<code>/notifications/unread-count</code>	Unread count
PATCH	<code>/notifications/read-all</code>	Mark all read
GET	<code>/messages/conversations</code>	Conversations
POST	<code>/messages/conversations/direct</code>	Start DM
GET	<code>/messages/conversations/:id/messages</code>	Get messages
POST	<code>/messages/conversations/:id/messages</code>	Send message

Files & Gallery

Method	Path	Auth	Description
POST	<code>/files/upload</code>	JWT	Upload file
GET	<code>/files/serve/:orgId/:filename</code>	—	Serve file
GET	<code>/files/record/:recordId</code>	JWT	Files for record
GET	<code>/gallery</code>	JWT	Gallery list
POST	<code>/gallery/upload</code>	JWT	Upload to gallery
GET	<code>/gallery/serve/:orgId/:filename</code>	—	Serve gallery image

Global Lists

Method	Path	Description
GET	<code>/global-lists</code>	List all lists
POST	<code>/global-lists</code>	Create list
GET	<code>/global-lists/:id/items</code>	Get items
POST	<code>/global-lists/:id/items</code>	Add item
GET	<code>/global-lists/:id/tree</code>	Tree view
GET	<code>/global-lists/:id/by-parent/:parentItemId</code>	Filtered by parent

Email

Method	Path	Description
POST	<code>/emails/send</code>	Send email
GET	<code>/emails</code>	Email log
GET	<code>/email-templates</code>	List templates
POST	<code>/email-templates</code>	Create template
PATCH	<code>/email-templates/:id</code>	Update template

Request Engine

Method	Path	Description
GET	<code>/requests</code>	List requests
POST	<code>/requests</code>	Create request
GET	<code>/requests/queue</code>	My queue

Method	Path	Description
POST	<code>/requests/:id/actions</code>	Execute action
GET	<code>/request-types</code>	List request types
GET	<code>/request-blueprints</code>	List blueprints

Workspace

Method	Path	Description
GET	<code>/workspace/summary</code>	Dashboard summary
GET	<code>/workspace/tasks</code>	List tasks
POST	<code>/workspace/tasks</code>	Create task
PATCH	<code>/workspace/tasks/:id</code>	Update task
GET	<code>/workspace/notes</code>	List notes
POST	<code>/workspace/notes</code>	Create note

Common Query Parameters

Param	Usage
<code>page</code> , <code>limit</code>	Pagination
<code>search</code>	Text search
<code>filters</code>	JSON array of filter conditions
<code>sortBy</code> , <code>sortDir</code>	Sorting
<code>moduleId</code>	Scope to module
