

Changelog

CRM/ERP Platform Documentation

Changelog

[Unreleased]

Added

- Field Rules engine: conditional show/hide/set-value rules per module
 - Blueprint task queue extensions (priority, due date, sent note, title)
-

2026-07-02

Added

- `ticketNumber` field on `FormSubmission` — auto-assigned reference number for submissions
-

2026-07-01

Added

- Field Rules: `FieldRule` model, service, controller, and frontend rule builder
 - Extended `BlueprintTask` with `title`, `priority`, `dueDate`, `seenAt`, `processedAt`, `requestType`, `sentNote`
 - Purge migration for soft-deleted blueprints
-

2026-06-30

Added

- Team roles via Global List (replaces hard-coded team role enum)
- Blueprint and Request tracking fields

Changed

- Team roles are now managed through the Global Lists system rather than a separate DB table
-

2026-06-29

Added

- Record routing system (`RecordRoutingConfig` , `RecordRoutingController`)
 - Email design field on email templates
 - Workflow SEND_EMAIL action with template + merge tag support
-

2026-06-25

Added

- Email system: `EmailTemplate` , `EmailLog` , `SmtSettings` models
 - Email Templates UI (`/settings/email`)
 - Send email from record detail
 - Email history view
-

2026-06-22

Added

- Submission Receipt: printable confirmation page after form submission (replaces ticket success screen)
- OCR Upload tab in Form Builder (renamed from "Documents")
- Submission Receipt tab in Form Builder (renamed from "Ticketing")

Fixed

- Radio button selection reliability (replaced `<label>/<input>` pattern with `<div role="radio">`)
- OCR not pre-selecting RADIO/SELECT fields (case mismatch in option values)
- "Document extraction is not configured" error when `ANTHROPIC_API_KEY` only in frontend `.env.local`

Changed

- Form Builder drag-and-drop: entire card is now draggable (not just a handle)
 - Drop indicator shows as a line at the insertion point
 - Right-edge resize handle toggles field width 50%/100%
 - Filled form fields show green border + checkmark icon
-

2026-06-15

Added

- Publications & Gallery module (announcements, news feed, media library)
 - Portal customer-facing pages builder
 - Portal user management
-

2026-05-23

Added

- Initial schema: Organization, User, DynamicModule, Field, Record, Workflow, Blueprint, Form, Dashboard, Analytics
- Multi-tenant JWT authentication

- Permission matrix system
- Global Lists with hierarchy support
- Form builder with public form submission
- Workflow automation engine
- Blueprint stage workflow
- Portal (customer-facing) authentication and pages
- Workspace (tasks, notes, calendar)
- Performance Tracker
- Request engine (service requests with blueprints)
- Real-time WebSocket notifications
- Google Calendar sync
- CSV import/export
- Audit logging
